Flash Flood Advisory

Antigua and Barbuda Meteorological Services

2:55 PM Wednesday 29 July 2020

...Flash Flood Advisory for Minor Flooding in Effect for Antigua and Barbuda Until 6 pm...

The Antigua and Barbuda Meteorological Service has issued a flash flood advisory for minor flooding of flash-flood prone areas of Antigua and Barbuda. No immediate preparations needed; little to no flood impacts anticipated. The Met service will continue to monitor for any changing weather conditions.

Timing: Until 6 pm today.

Synopsis: At 2:30 pm, radar indicated heavy showers from Potential Tropical Cyclone Nine affecting the area. Rainfall rates of greater than 40 mm (over 1.60 in) per hour will cause minor flash flooding of low lying and poor drainage areas. Streams, creeks and drains may be elevated or even overflow into streets and flash-flood-prone areas; however, property damage, if any, will be minimal.

Potential Impacts: Little to none.

Precautionary/preparedness actions: A flash flood advisory means that streams, creeks and drains may be elevated or even overflowing into streets and flood prone areas; however, property damage, if any, will be minimal. Do not drive your vehicle into areas where the water covers the roadway. Report severe weather to the Met Office.

Stay tuned to updates coming out of the Met Office via antiguamet.com.
